

ID Laminator, Model 5021T

The **5021T ID Laminator** is a simple to operate machine which has been specifically designed to apply a heat sealable Security Pouch to a paper or Teslin insert.

The special Security Pouch coated on both flaps with a temperature-activated adhesive is placed in a carrier and inserted into the laminator. The carrier is automatically transported through rollers within the machine, which is preset at the correct temperature and pressure to melt the adhesive and apply it to the insert.
